Degree: Very Good

Experience

Nile University, 6th of October

OCTOBER 2023 - PRESENT

Research Assistant

Appen

JULY 2022 - OCTOBER 2023

Search Engine Evaluator

Juhayna Food Industries, Egypt

AUGUST 2021 - SEPTEMBER 2021

Intern

Projects

RoutePro: Optimization of fuzzy real time vehicle routing problem

JANUARY 2023

- This project aims to solve the capacitated vehicle routing problem, as it's going to work on planning optimal routes that a supplier truck should take to deliver multiple packages to multiple points based on some CVRP constraints.

KUB : Keep Up Buying (Flutter Mobile Application Project)

FEBRUARY 2024

- This project is an e-commerce mobile application using Flutter and Firebase to manage everything, You can choose your role to be a user or provider and each has some features

Online Train ticket reservation

MAY 2021

- This Project is vital for travelers seeking convenience and efficiency in booking their journeys. Leveraging Django in Python and professional JavaScript coding allows for a robust and seamless platform.

Football Playground Reservation

OCTOBER 2021

- This project is a Java-based application designed using Object-Oriented Programming (OOP) principles and leveraging various Design Patterns to facilitate the booking and management of football playgrounds.
